Time: 30 min

Do you agree or disagree with the following statement?

Childhood is the happiest time of a person's life.

Use specific reasons and examples to support your opinion.

You should write about **100 - 150** words.

I agree with the statement "Childhood is the happiest time of a person's life", because when you are a child, life seems to be more easy, colourfull and interesting, then when you become an adult person. Adult persons always have to think, analize, to be reserved and to do things they don't want to do. And being a child you can laugh loud and sincere, and play and walk with your friend and just think only about present.

Most of my memories from childhood are happy, and I'm thankful for my parents, who have made them so interesting. Also children can more easy make friends, and ~~after~~ friends from childhood are often the most dependable. and forget old problems then adults.

Cause of that I think, that childhood is the happiest time of a person's life.
