Time: 15 minutes

- Task 1.** You will hear a boy called Adam telling his class about a hot air balloon flight he went on. For each question, fill in the missing information in the numbered space. You will hear the conversation twice.

ADAM'S HOT AIR BALLOON FLIGHT

The flight in the balloon lasted for (1) 3 hours on hour Adam could see as far as the (2) mountains from the balloon. Adam didn't recognize a local (3) bridge from the air. Adam was surprised that it was (4) warm in the balloon basket. Adam didn't like having to (5) stand in the basket. The balloon finally landed on a (6) golf course.

- Task 2.** Look at the six statements for this part. You will hear a boy, Jack, and a girl, Mandy, talking about sports programmes on TV. Decide each sentence is correct or incorrect. If it is correct, correct, chose the letter A for YES. If it is not correct, chose the letter B for NO. You will hear the conversation twice.

7. Mandy knows that Jack is a fan of sports programmes on TV.
8. Mandy accepts Jack's invitation to watch a sport programme at his house.
9. Jack agrees with Mandy that there's currently too much sport on TV.
10. Mandy suggests that Jack should take part in more sports activities.

Put each sentence, a-g, into the correct place to complete the text about PR managers.

- ☒ a) They were giving the water to people who were injured.
- ☐ b) However, it took some years for the company to change this image.
- ☒ c) He or she must defend a business when something goes wrong which may affect the company.
- ☒ d) This is particularly true when tourism is destroyed in a country by a natural disaster.
- ☒ e) So if journalists and the media find out any interesting news about their private lives it can also affect the company.
- ☒ f) The way a company manufactures its products might attract criticism.
- ☐ g) Problems with the people who work for you also often cause PR problems.

The job of the public relations manager is a difficult one. 11. c So, if the press finds out the company is doing something unethical, for example, the PR manager will have to talk to journalists and convince customers that they have done nothing wrong. Here are the main things that the PR manager must look out for:

Acts of God

These are the things which no human can stop. For example, when the weather causes a crisis because of a hurricane or tornado, it may cause a PR disaster. 12. d Many people remember the famous tsunami of 2005 which hit countries such as Thailand. PR managers were working day and night to save tourism.

Business Operations

13. For example, if you had a factory which was putting chemicals or toxins into water and then the water was affecting the local area, you would need a highly-skilled PR manager. This person needs to make sure the general public doesn't stop buying the company's products.

Gossip and Rumours

Gossip and media rumours can really damage a company and affect the brand. Take the case of the international company which was accused of being evil. Some people said it was working with the 'Devil'! The gossip started with a competitor and was untrue. 14.

Staff

15. When New York's Twin Towers fell down on 9/11, a member of staff at a Starbucks Coffee House was charging emergency rescue workers for bottled water. 16. This story was passed around on the Internet and was highly damaging.

Scandal

Many celebrities often endorse a company's products. 17. Similarly, news about financial problems in the company will mean the PR department needs to get busy.

Read the text. Mark the sentences TRUE or FALSE.

Ever since early humans first became aware of their environments, they have recognized the importance of the sun's heat and light to life on the earth. People around the world have worshipped the sun as a god, and more recently the sun has been the subject of intense study by scientists.

The sun is actually a star, and is described by astronomers as a rather "average" star. But the sun is much closer to the earth than any other star. The sun's average distance

from the earth is only 150 million kilometres. Although this distance is obviously very great, other stars are much farther away. At the sun's relatively close distance, light can reach the earth in about eight minutes. The next nearest stars to the earth, however, are so far away that their light takes four years to reach the earth! Given these unimaginably vast distances, it is easy to understand why the sun seems so much brighter than any other star.

The sun is much larger than the earth or the moon. In fact, the sun's diameter is about 110 times that of the earth, and about 400 times that of the moon. This might seem surprising, given that the sun and moon appear to be of virtually equal size when we look at them in the sky. However, the sun is about 400 times farther away from us than the moon is, and this explains why the sun and moon appear to be the same size.

This fact is a remarkable coincidence, and it makes possible the occurrence of spectacular solar eclipses, when the moon seems to cover the sun almost perfectly. Note that even though the sun is a fascinating object of study, you should never look at it directly. Even if you are wearing dark sunglasses, the intense radiation from the sun can seriously damage your eyes.

The sun is composed of densely-packed gases, mainly hydrogen and helium. At the core of the sun, hydrogen is transformed into helium by the process of nuclear fusion, which releases tremendous energy. Temperatures at the sun's core are estimated to reach 15 million degrees Kelvin; at the surface of the sun, the temperatures are much cooler, reaching only a few thousand degrees. The sun will someday use up all of its hydrogen, causing it to gradually die. But do not worry about this - scientists estimate that the sun will have enough fuel for at least another six billion years!

Periodically, there are magnetic storms on the surface of the sun. Astronomers refer to these disturbances as sunspots. The activity of these sunspots sometimes causes interference with radio transmissions here on earth, and is responsible for the

“northern lights” that are sometimes seen at night in northern latitudes.

18. The sun was considered one of gods in many cultures. **TRUE**
19. The distance between the earth and a star is less than 150 million kilometres. **FALSE**
20. The sun and the moon look equal in size. **TRUE**
21. The sun consists of more than two kinds of gases. **TRUE**
22. The sun's core temperature is lower than the surface temperature. **FALSE**
23. The sun's decline will strongly depend on the quantity of helium. **FALSE**
24. The sun will exist for more than a billion years. **TRUE**
25. “Northern Lights” appear due to the storms on the sun's surface. **TRUE**

Writing

Time: 40 min

Write an essay on the following topic.

According to an international travel magazine, many tourists today fly straight to their holiday resort and almost never leave it. Unlike tourists in the 1960s and '70s they return home with no experience of the local culture.

Why do you think this happens? How was tourism different in the past?

Give reasons for your answer and include any relevant examples from your own experience. You should write about **200 - 250** words.

Well, I don't travel very often and I'm not an experienced traveller but I'll try to explain my opinion.

Perhaps, it happens because modern tourists have become quite lazy nowadays. There is a big reason for it. Life in the 21st century is extremely intensive, so it requires lots of energy from a person to deal with work, sport, health and family problems etc. All of us become very tired during the whole year of work before legal vacation. That's why so many people fly straight to their booked resort with comfortable hotels where a beach ~~is~~ full of soft white sand and cool ocean or sea water is located. People get there just in order to relax and refill their energy tanks before the new work season comes.

About 50 years ago the situation seemed to be different. Then the period of globalisation was on the highest point of its progress. People of all nations from all over the world began exchanging their local cultures. It became possible when airplanes and ships got an opportunity to reach every point of our planet. Thanks to it people started finding the travelling romantic, an interest of having experience from foreign countries woke up in their minds. People always wanted to know: is there anyone on this big planet, whose lifestyle and local culture differs from ours?

Today all the nations of ^{the} Earth have got known with each other and we can always say where and how one or another nation lives and even if we don't know some facts about it, we can search the needed information in the Internet or watch simply the famous "Heads and Tails". Honestly, I'm not included in this majority of modern tourists. Anyway, I'm always able to find extra energy to experience local culture of visited country. As for me, people should have the will for it...
